## Have you realized that there are Fortunes in Cuba?

Particularly true, now that the country is a United States possession, Scart ely anyone but knows that Ceba is a country of grand possibilities for capital and enterprise. And also that the was impoverished condition of Cuba makes it possible to secure the very finest Sugar, Todacco, Fruit, and Timber-growing lands at a more fraction of their value. But, single hand-ed, the man of average means is help-less to avail himself of this opportu-nity. Money is needed to make money there, and, realizing this, the Cuban Land and Trading Company was formed—a syndicate of small in-vestors. By co-operating—clubb ng to-gether, as it were—the many small amounts become a large capital, by which the plan of buying, selling, and developing of Cuban and Porto Rican lands is undertaken. Representatives have aiready been sent to the field of operations and negotiations are now pending for the purchase of huge tracts of Cuban lands. The whole enterprise is practical—there are no visionary enthusiasts in it. More members are wanted—not many—as the which the plan of buying, selling, an I bers are wanted-not many-as the amount of stock offered is limited, and shares are being offered at the most liberal kind of an inducement price. If you are interested—or even if you are not—look into the company's plans and aims—note the personnel of its officers—get some of the literature—most in-teresting reading—and maps of Cuba
